Mastech InfoTrellis Base Pack Assessment for IBM Cloud Pak For Data

## Data Quality and Data Governance an Essential to Implement Successful AI

A study from leading general management magazine states that only 3% of enterprise data meets basic quality standards regardless of the volume or type. In a scenario where enterprise spans across the globe, data governance leader is accountable for regional regulatory concerns and restrictions.

In the information, age data is quickly becoming an enterprises' most strategic corporate asset for driving operational excellence and revenue growth. With a strict regulatory environment and a need to protect and extract accurate value from enterprise data, it is becoming a formidable challenge and business imperative.

Mastech InfoTrellis Data Quality and Data Governance Assessment for IBM Cloud Pak for Data, Helping Clients Build Winning Data, Analytics, and AI Strategies

We design a roadmap to use smart decentralized technologies and artificial intelligence to help source, curate, and utilize clean/quality data.

We help enterprises achieve success over

Regulatory Compliances

Security and Privacy

Revenue Generation

Operational Efficiencies

Our Assessment offerings include

Data Governance Implementation

1 Data Governance Strategy

2

3 Data Governance Optimization

Improve your data quality consistently, trust your insights, deliver it across your enterprise at scale to facilitate data-driven decision making.

Empowering your data and democratizing it, will give you an extra edge to speed up your digital transformation journey. This can betide when you have your Data Quality and Data Governance assessment in place.
